For point #2 above, we'd like to try using a simple digital system. The simplistic aim will be to ensure that everyone attending can be contacted if necessary for Covid tracing. This system will allow players to enter without full disclosure of personal details (the primary concern of some). These details can remain off-the-record, but of course can be obtained through the HKHA Registration systems if required (likewise attending players will be recorded on the official e-match card). The Visiting Team Captain will need to be the point of contact and as such will be vouching for his/her teammates listed on the team sheets. The host captain will call their phone at the entrance in front of the Security Officer to confirm their status.
